RE: Notification of PCB Activity

Ladies and Gentlemen:

We are not currently engaged in PCB waste handling activities at the Sistersville Plant. However, 33 PCB-contaminated capacitors remain in service at the plant.

Eventually, we will become a generator of PCB waste with on-site storage facilities.

Enclosed is the Notification of PCB Activity as required by Subpart K (PCB Waste Disposal Records and Reports) of 40 CFR 761. We request the use of our previously issued identification number under RCRA for future PCB waste activities.

If you have any questions concerning this notification, feel free to contact Joe Selnekovic or myself at 304/652-3211.

Sincerely,

R. E. Tuttle
Director of Health, Safety &
Environmental Affairs
